Aluminum Driveshaft Tube Repair Bushing

T500-125-065

APPLICATION:

- 5" diameter x .065" wall aluminum driveshafts

DETAILS:

- Made from 6061-T6 aluminum
- 5" OD x 3" effective length
- Male end sized to accept 5" OD x .065" wall tubing
- Female end sized to accept weld end yokes for use with 5" OD x .125" wall tubing

Part Number

T500-125-065

Aluminum Driveshaft Tube Repair Bushing

PART SUMMARY

Sonnax now offers **T500-125-065**, a high-quality aluminum driveshaft tube repair bushing. This bushing allows driveshaft shops to cut off worn or damaged driveshaft end yokes beyond the weld area and make up for the lost tubing length when attaching a new end yoke. By using these bushings, the new welds will be performed on virgin material and will be unaffected by the previous weld. The use of these bushings on one or both ends of the driveshaft can also provide a means to add length to a shaft if required.

This bushing/extension is designed for mating 5" x .125" wall weld end yokes to 5" OD x .065" wall aluminum driveshaft tubes.
