TORQUE CONVERTER PARTS CATALOG VOLUME 6 & ONLINE CATALOG AT WWW.SONNAX.COM

TO-WA-16 along with CH-N-1 bearing replaces:

Item Numbers 4, 5 & 7 for Toyota A340H on page 272. Please also add to the stator cap details section starting on page 361.

Sonnax now offers **TO-WA-16**, an aluminum stator cap/bearing adapter for the impeller side of the stator in A340H units. This stator cap allows the rebuilder to use our readily available bearing, **CH-N-1** as an alternative to the OEM bearing and associated bearing race **TO-N-6** and **TO-N-7**.

NOTE: The bearing side pocket diameter of the impeller hub needs to be enlarged to 71.80mm/72.00mm (2.827"/2.835") in order for the **CH-N-1** thrust bearing to fit.
