The AX4S, AX4N (4F50N) single clutch converters have a piston that is prone to cracking due to manufacturing flaws. A cracked piston will not only lock up improperly, but will shave material off the OEM friction ring. This loose friction material will contaminate the whole transmission. The Sonnax **FD-DA-19PBF**, a fully machined forging, is a replacement piston plate that corrects this OEM problem. **466300PT** PowerTorque™ friction ring is already bonded to **FD-DA-19PBF**.

#### Features & Benefits

- Replaces the OEM piston that is prone to cracking
- Machined from a steel forging
- Increased wall thickness for greater stiffness: .200" (5.08mm) Thick
- Bonded Raybestos® PowerTorque™ 9.50" x 8.25" x .066" (241.30mm x 209.55mm x 1.68mm) Friction ring
