

Reverse Band Strut

32710-01

1 Reverse Band Strut

Installation Instructions

1. Remove the oil pan and valve body, exposing the inside of the transmission case.
2. Remove the adjusting screw from the reverse band lever.
3. Remove the original equipment strut and discard.
4. Insert the **32710-01** replacement strut with the notched end fitting into the notch on the band and the flat length facing the band.
5. Replace the adjusting screw and set according to the manufacturer's specs.
