The **FD-CC-22S** billet front cover converts early style 6-stud Ford 5R110W converters for use in the new, late style 8-stud Ford 5R110W applications.

Features & Benefits

- Converts early style 5R110W 6-stud converters for use in late style 8-stud applications
- High strength weld-on studs will not flex, pull or screw out
- Thicker cross section between studs and lockup surface provides greater cover strength, support of the studs and heat dissipation
- Longer lip to make it easier to reuse impeller covers
