Aluminum Weld Yoke

T31-28-3012

Application:

- 1310 Series using 3" OD x .125" driveshaft tubing

Details:

- Made from forged 6061-T6 aluminum for increased strength.
- Designed for use with 3" OD x .125" aluminum tubing.
- Extra-thick "weld wall" prevents costly weld blow through.
- Integral centers provide for quick and accurate lathe and welding setups.

Part Summary:

Sonnax now offers **T31-28-3012**, an aluminum weld yoke for 1310 Series driveshaft applications. The Sonnax design maximizes weld quality and efficiency to allow solid production welding. The extra thick material on the weld wall can be easily machined for those odd tube sizes. Integral centers allow the part or assembly to be mounted for lathe or welding operations quickly and accurately.

T31-28-3012

Aluminum Weld Yoke

Additional Information

All Sonnax aluminum weld yokes can be easily mounted on 60° centers using our patent pending centering tool.
