POWERGLIDE

Part Summary:

These Sonnax Powerglide Gear Sets offer unsurpassed quality and materials for your Powerglide racing transmissions. Our state-of-the-art heat treatment process provides the consistent case hardness and depth that racing applications demand. Made from 9310 steel, the gears are manufactured to meet AGMA class 8-9 specifications for the most accurate gear geometry available. And to best fit builders' requirements, parts are available as complete Master Gear Sets or by component type.
