

Features & Benefits

- Made from Anodized Billet Aluminum
- Dual seal "Teflon/D-ring" design provides superior sealing capability

Accumulator Piston Kit

Part No.

22841-04K

1 Accumulator Piston
2 Teflon[®] Seals
2 D-ring Seals

Part No.

22841-04SK

Replacement Seal Kit

CHRYSLER 727, 904, 42-46-47-48RH/RE

Part Summary:

OE plastic accumulators are prone to breaking and have poor sealing qualities. Metal rings currently offered with aftermarket accumulators have issues with sealing as well. Sonnax now offers **22841-04K**, with a dual seal Teflon[®]/D-ring accumulator piston. The Teflon[®] seal will prevent piston to bore contact, the D-ring seal will vastly improve sealing compared to steel rings currently offered by the aftermarket.
