

Rear Band Anchor Pin Kit

56521-K

10 Oversized Pins

1 Reamer

Installation Instructions

1. Remove the loosened original pins from the case.
2. Insert the chamfered end of the reamer into the worn bore. With short strokes to avoid cracking the case and ensure a clean pilot hole, hammer it through the hole. Once through, the tapered end of the reamer allows it to fall out into the case.
3. Install the oversized pins into the newly enlarged holes.
