

High Performance **TORQUE CONVERTER** Parts

Announcement

GM UNIVERSAL

Features & Benefits

- Machined from low carbon steel
- .375" Thick
- Dual bolt pattern
GM 10.75" & 11.50"
- 6-Bolt mounting style

Mounting Ring

Part No.

GM-WS-31

1 Mounting Ring

Part Summary:

Sonnax now offers an extreme horsepower, universal, weld-in mounting ring **GM-WS-31** with a dual bolt circle that allows all 3 bolt holes of both the 10.75" and 11.50" GM bolt patterns typically found on aftermarket flexplates to be used. This heavy duty mounting ring allows performance builders to adapt various cores for use with GM flexplates with the dual 10.75" and 11.50" bolt circle. The use of all 6 mounting bolts prevents flexplate damage when used with extreme, high horsepower applications.
