Replacement Seal Kit

### PART SUMMARY

Sonnax now offers **28715-01K**, our new Powerglide “Shorty” output shaft housing. This shorty cover is made from 6061 aluminum and utilizes a Torrington roller bearing in place of a bushing to support the coupler and output shaft. The Sonnax design eliminates bearing walk-out and incorporates a drainback hole to prevent seal blow-out. The kit comes with all the required seals, gaskets, bolts and washers.

**Note:** Must be used with bearing style output shaft yoke or coupler. The coupler should have a 1.5000/1.4995” diameter.
