

COMPLAINT

SECONDARY COMPLAINT

Excessive endplay

- Lube failures

CAUSE

The factory shims do not offer an adequate selection for proper endplay adjustment

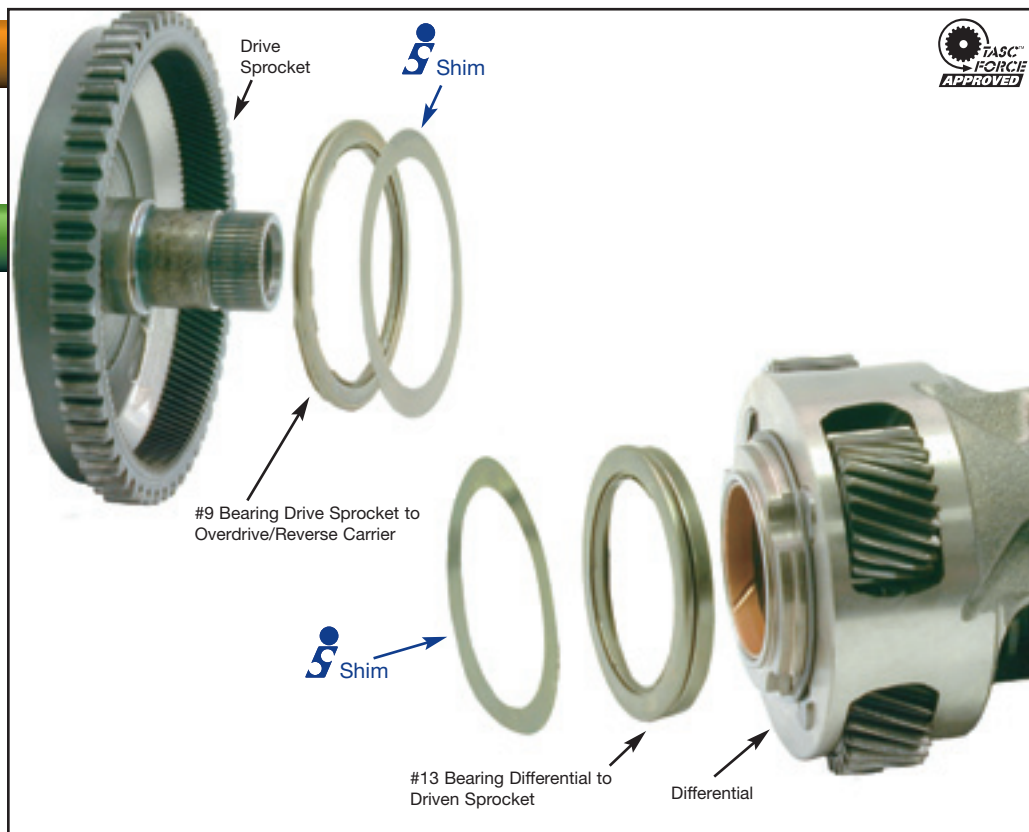

CORRECTION

This shim kit offers a more precise endplay adjustment for the gear train and final drive.

Shim Kit for Setting Endplay

73251-01K

2 Shims	.008" & .015" thick for #9 Bearing
2 Shims	.005" & .010" thick for #13 Bearing

Sonnax Part Summary

Sonnax now offers a shim kit **73251-01K** to adjust both the planet-to-drum endplay and the differential endplay. These shims offer a finer endplay adjustment than the OEM selective washers, resulting in a more precise endplay setting.
