

KM (175.5 '95 60,000 MILES)

Condition: Weak pump. Note low flow idle drive oscillation. Low oil level and/or filter gasket sucking air on acceleration.

Notes: Normal to have no flow in park. Sonnax Manual Valve 41750-03K will flow .5-6 gpm in park. TCC dips and slowly modulates apply psi during apply. TCC does not cancel with brake pedal, only on TPS lift/closed.
