Associated Items:

- FD-WS-27, Steel Stator Cap
- FD-IM-IL, Impeller Assembly

Part No.

FD-N-9

Thrust Bearing

Sold in prepackaged quantities of 25 units

Please refer to our

2003 TORQUE CONVERTER PARTS CATALOG

FD-N-9 is:

Not currently cataloged for 5R110W and should be added to the Bearing and Race Details Section on page 309. It can be referenced as an option to Item Number 5 of Reference Figure 2.17 on page 92 for E4OD applications using .588" tall stator caps and an option to Item Number 5 of Reference Figure 2.18 on page 96 for 4R100 applications.

Sonnax now offers **FD-N-9**, an enclosed OEM bearing used in 5R110W converters. This part must be used with associated steel stator cap **FD-WS-27**. This bearing and stator cap assembly can be used to update earlier E4OD/4R100 units with plastic stator caps and associated wear plates.
