

Heavy-Duty Low/Reverse Modulator Sleeve Kit

36947-09K

- 1 Sleeve
- 1 Orificed Valve
- 1 Holding Valve
- 1 Spring

Disassembly:

1. Remove and discard the OEM sleeve, plunger valve and spring.
2. Keep the OEM sleeve retainer.

Installation:

1. Ensure the replacement sleeve and valves are properly assembled per the photo and illustration below.
2. Place the replacement spring into the outboard holding valve spring pocket.
3. Push the assembly into the bore, spring end first, until the OEM retainer can be installed.
