

GM-ST-086

"086" GM 245MM STATOR

H I G H P E R F O R M A N C E C O N V E R T E R P A R T S

FEATURES & BENEFITS

- "086" GM 245mm blade profile
- Accepts Sonnax mechanical diodes or sprag cartridges
- High stall speed
- Low stall torque ratio (STR)

Part No.

GM-ST-086

Stator

PART SUMMARY:

The versatile GM 245mm core allows builders to assemble a high performance converter with a variety of stall speeds and torque multiplication rates. The weakest part of the converter is the one-way clutch. The Sonnax GM-ST-086 stator utilizes the same one-way clutch components as the 8" Opel (3.25" bore) stator and can replace the OEM 245mm stator when assembling Sonnax non-lockup racekits. This feature allows the use of Sonnax mechanical diodes or sprag cartridges when building high performance converters based on the GM 245mm core.
