

Features & Benefits:

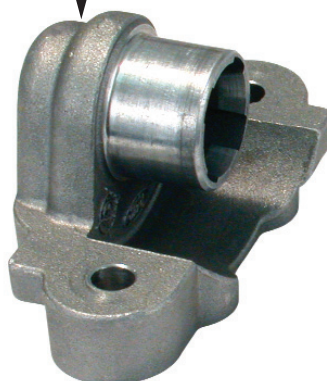

- Direct replacement
- Will provide an earlier upshift due to the increased weight over OEM

Part No.

56615-35

1 Governor Weight

Governor Housing

35mm Governor Weight

Governor Valve

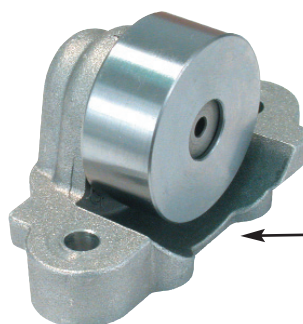

Spring

PART SUMMARY

In vehicles with A4LD transmissions it is common to experience L.A.O.S.S. (Long Anticipated Overdrive Shift Syndrome). To correct this problem, Sonnax is now offering **56615-35**, the 35mm governor weight. By replacing the 30mm weight with this 35mm weight, a normal overdrive shift is attained. This will also correct shift problems associated with worn 35mm governor weights which are not readily available or if cores are worn as well.
