

Sonnax
TRANSMISSION

REPLACEMENT PARTS

125C(5/84 AND UP)

PUMP SHAFT AND BEARING

Features & Benefits:

- Higher grade steel
- Improved wear resistance

Part No.

75877A

1 Shaft

Part No.

75153A

1 Bearing

PART SUMMARY

The Sonnax 125C pump shaft is made of higher grade steel to improve the wear resistance of the spline and bearing surface. The shaft incorporates a solid steel collar in place of the OEM stamped metal collar. This shaft and bearing directly replaces late model 125C shafts and bearings from 5/84 and up only.

INSTRUCTIONS

1. Remove the original pump shaft and bearing.
2. Install the new bearing with integral seal into the pump housing with the seal toward the outside of the pump where it will face the collar on the pump shaft.
3. Install the Sonnax pump shaft.
