

TORQUE CONVERTER

FD-CC-11, FD-CC-12D, FD-CC-12G

Sonnax Design E40D Front Covers

- Made from high quality AISI 1026 steel forgings
- High strength weld-on studs will not flex, pull or screw out
- Thicker cross-section between studs and lock up surface for greater strength, better support of the studs and better heat dissipation
- Low surface finish on the lock up surface for consistent lock up and long clutch life
- Center thrust area is ground and parallel to accept turbine hubs with bearings, fiber washers or bimetals
- Thrust face to lock-up surface is the same as OE for more consistent rebuilding results
- Longer lip makes it easier to reuse impeller covers

These covers are item no. 20 of ref. figure 2.14 on page 78 in the 1999 Torque Converter Parts Catalog Update

The applications are as follows:

FD-CC-11	6 stud diesel
FD-CC-12D	4 stud diesel
FD-CC-12G	4 stud gas
