

PREPACKAGED QUANTITIES

The next time you place an order, help us to serve you better by using the guide below to adjust your ordering amounts to our prepackaged quantities. Our ability to fill and ship your order in a speedy, efficient and accurate manner is greatly enhanced when we can ship prepackaged quantities rather than having to break packages down.

We have included the chart below as a guide to our prepackaged amounts along with the

ordering unit, which is shown in parentheses on the right. For example, if you order (1) for an item that shows (1=1 Piece) you would receive 1 of the item, such as a damper spring, bearing or o-ring. If you order (1) for an item that shows (1=1 bag), you would receive a bag's worth, or 100 pieces if it were accordion springs or rivets. If you have any questions on ordering units and prepackaged quantities, ask your Sonnax sales representative.

Accordion Springs	100/bag 5000/box (1=1 bag)
Aluminum Washers	10/bag (1=1 piece)
