

AODE ('91-'95)

Part No. SC-AODE

Sonnax Sure Cure® Kits combine "the best" Sonnax products into one box, offering rebuilders a convenient and cost-effective way to address common transmission problems. These kits simplify ordering, stocking and estimating job costs, and include easy-to-read, step-by-step instructions that cover the inspection and repair of the most critical areas of the unit, and even a reference list of rebuilding specifications.

Rebuilder Data Sheet

This AODE transmission reconditioning kit includes the following Sonnax parts and addresses these problems:

Sonnax Part	The SureCure® for:
• Pressure regulator valve (76948-01)	Low line pressure, poor line rise. Highlight: Redesigned anodized valve stops leaks and has annular grooves
• Boost valve assembly (76948-02K)	Poor reverse boost, harsh reverse or broken parts
• Bypass clutch control valve assembly (76948-04K)	Code 628, TCC apply and release problems
• Overdrive servo pin w/seal (76833E)	Overdrive band failure
• 2-3 shift valve end plug (76999-MED)	Falling out of 3rd, no 4th condition
• Solenoid regulator valve retainer shim (76948-11)	Shims, retainer clip to restore solenoid pressure
• Teflon® sealing ring kit	Direct and forward clutch leakage
• Intermediate spiral snap ring (76554RK)	OEM ring blown off at high RPM
