

## Isolator Valve Sleeve Kit

### 77754-ISO

1 Isolator Valve Sleeve

1 Retaining Clip

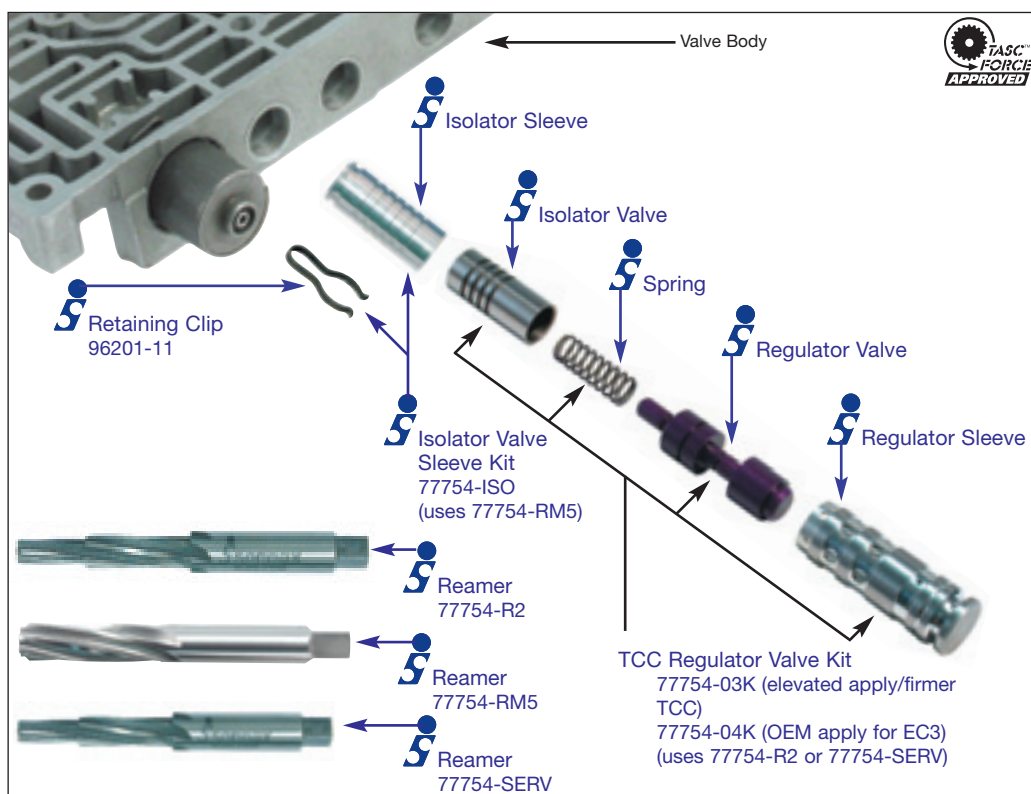

**Note:** U.S. Patent No. 6,990,996  
& 7,104,273

This kit requires the use of a  
reamer **77754-RM5** and will  
be installed along with  
**77754-03K** or **77754-04K**.

**More technical information**  
is available at [www.sonnax.com](http://www.sonnax.com). Type  
in this part number under "Part Finder."

### Wet Air Test to check for isolator bore leakage

To test for a signal oil leak, place oil into the PWM/TCC feed (2nd clutch oil on non-PWM units, see photos below). Follow with low air pressure. There should be minimal/no leakage through the exhaust port.
