

Five-Strut Mechanical Diode

Part No.
GMFD-MD-1

Mechanical Diode

NOTE: Fits 8" Opel stator

Application

Ford

Ford 32-Tooth Spline

This one-strut engagement, five-strut mechanical diode gives high performance builders the ability to adapt the popular 8" Opel stator to the large diameter Ford 32-tooth stator support shaft. In the past, the greatest factor limiting torque was the input shaft diameter. The Ford stator support shaft allows a larger input shaft and higher torque capacity.

Features & Benefits

- Made from hardened S7 tool steel
- Allows for larger shaft input and higher torque capacity
