

## Transfer Case Saver Spacer

### **36605-01**

5 Case Saver Spacers

### **Installation Instructions:**

1. Remove linkage from the case.
2. Grind roughly .050" (half the thickness of the case saver spacer) from the end of the linkage that protrudes through the cam. Do this for the additional clearance needed to install the case save spacer.
3. Reassemble the linkage with the addition of the case save spacer.
