Torque Converter Parts Catalog 2000

FD-DA-14 is:

- Item Number 18 of Reference Figure 2.16 on page 72.

Sonnax now offers a heavy-duty clutch **FD-DA-14** for the late model single plate E4OD converter. In extremely high torque applications, the standard, single-plate damper springs bottom, causing harsh starts and possible spline damage due to impact loading. The new design has five additional nested springs to increase dampening capacity.
