Center Support Ball Bearing

Part No.

36743G

'89 & up

Center Support Gasket

PART SUMMARY

The **36743H-01** Center Support Hub replaces worn or damaged center support hubs in the '95-up E4OD. This hub requires the use of the '95-up OEM radial ball bearing, which is available as Sonnax p/n **96423-01**. Prevent cross leaking between the aluminum center support and the steel center support hub with Sonnax p/n **36743G**, a silicon printed gasket for all model year E4OD transmissions.
