

## Line-to-Lube Pressure Regulator Valve

### 36424-04K

1 Pressure Regulator Valve

**Note:** U.S. Patent No. 6,826,908

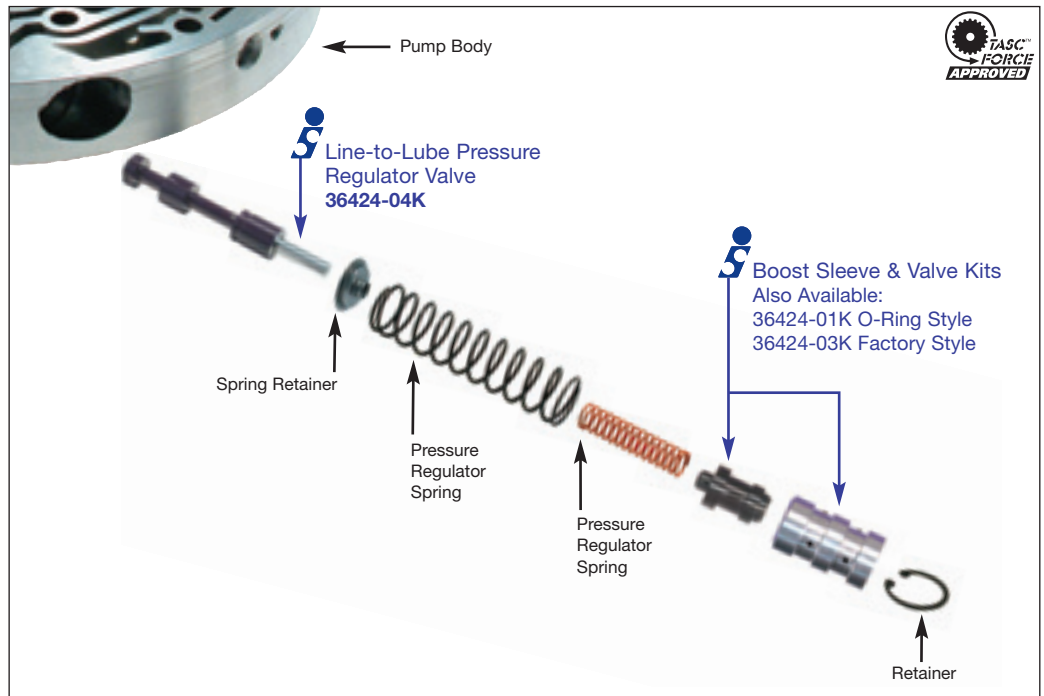

Also Available:

**36424-01K** O-Ring Style

**36424-03K** Factory Style

Each kit includes the following

Boost Valve & Sleeve Kit

### Instructions

**Note:** This is a drop-in replacement part, requiring no reaming or bore sizing.

1. If a line-to-lube orifice has been drilled into the pump casting wall, it must be plugged (refer to photo).
2. Remove OEM retainer, boost valve and sleeve, springs and spring retainer and PR valve.
3. Place spring retainer on PR stem and install PR valve.
4. Reinstall springs and original, or new boost sleeve and valve, **36426-01K**, and retainer.
