

Overdrive Servo Piston

62170-01K

1 Servo Piston	(88mm)
1 D-Ring	
4 Hardened Bolts	(6mm)

Note: Replaces OEM 88mm piston. Will also upgrade 75mm piston if used with new piston housing.

Installation/Assembly

1. Remove cover bolts, cover and OEM 4th servo piston.
2. Install Sonnax piston with seal, and torque the upgraded servo cover bolts to 69 lb-in.

NOTE: If using the Sonnax piston to upgrade from the smaller 75mm OEM piston, a larger OEM housing will be needed. Part number for the 88mm piston housing is GM 97039483 or Isuzu 8-97039-483-0. Servo cover has 88 or 75 on outside of casting.
