

TORQUE CONVERTER PARTS

FD-CC-20R

FRONT COVER

Application:

- Ford AODE, 4R70W
- 1993-Up Lincoln & Mustang 4.6L

Details:

- For 11-1/4" applications
- 10.60" stud pattern
- Made from forged steel
- Reaction clutch surface (bond friction to piston)

Associated Parts:

- 26761, 3/8"-24 nut (bag of 100)
- FD-CC-19R, Front Cover (12")
- FD-SC-R, Stud Covers

Part No.

FD-CC-20R

Front Cover

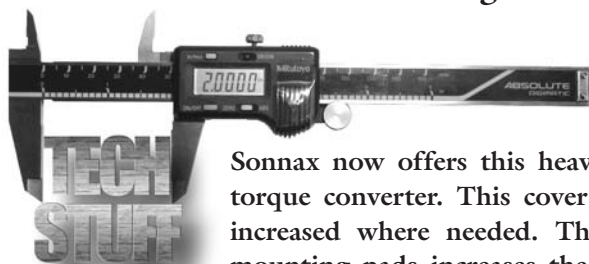

Sold in prepackaged quantities of 1 unit

FD-CC-20R is:

Item Number 20 of Reference Figure 2.15 on page 94.

Sonnax now offers this heavy-duty forged front cover for the 11-1/4" Ford AODE, 4R70W torque converter. This cover is machined from a forging that allows the wall thickness to be increased where needed. The increased thickness between the friction ring surface and the mounting pads increases the stiffness of the front cover. The friction surface on this cover is reaction (smooth) so that the friction ring is bonded to the piston instead of the cover. Bonding to the piston is easier and is preferred by most rebuilders. Bonding to this cover is still possible by machining a rough 90-120 RA finish on the clutch surface.
