- **FS-O-2V** O-ring
- **FS-O-27V** Radial Lip Seal

FS-WS-2

Retainer Repair Ring

Prepackaged Quantity: 5 Units

Sonnax **FS-WS-2** can simplify the rebuild procedure for Fichtel & Sachs "Captive Clutch Units" in ZF6HP26 torque converters. The Retainer Repair Ring allows the rebuilder to keep the damaging heat of the re-weld process away from the seal area. It will also simplify the process of adjusting the clutch release clearance which is very critical on these units.
