

ALLISON 1000

GPM/HZ

IDLE, PARK TO REVERSE

NORMAL

D-IDLE HOT

REV. STALL

D@ 55MPH

TCC OFF

TCC APPLY

Condition: Normal operating temperature.

Notes: Vehicle with 8.1 gas. TCC applies after 55 mph but does not release when you lift off throttle or during brake apply on coast until approximately 45 mph. Within eight frames of Snap-on movie, TCC duty goes from zero to 97% full apply. If the flow is over 5.5 gpm, flowmeter will display E.E. (error code). Flow must read on Vantage™ on a 1K frequency.
