

TRANSMISSION REPLACEMENT PARTS

AXOD & E, AX4S, AX4N

FORWARD PLANETARY BEARING & TOOL

Features & Benefits:

- Bearing not available separately from OEM
- Saves purchasing expensive planet
- OEM approved bearing

Part No.

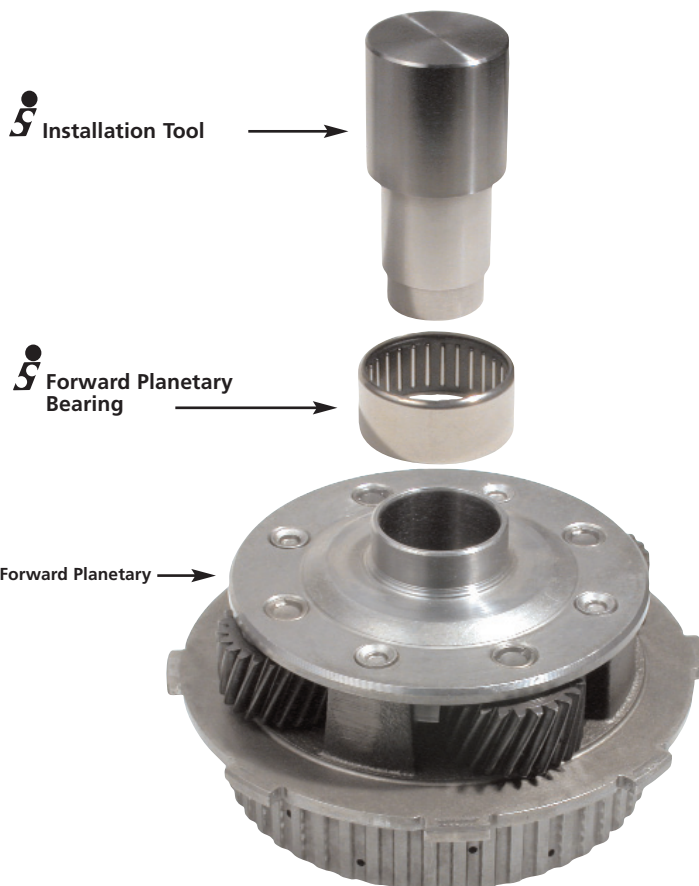

96003-01

Forward Planetary Bearing

Part No.

96003-MTL

Installation Tool

PART SUMMARY

Sonnax now offers **96003-01** as a replacement bearing for FORD AXOD & E and AX4S, AX4N transmissions. This allows rebuilders to buy a direct replacement bearing without paying for the expensive complete planet.

Installation tool **96003-MTL** supports the bearing during installation and prevents damage to the delicate outer race and sets the bearing to correct depth to prevent blocking of lube holes.

INSTALLATION INSTRUCTIONS

1. Use a suitable driver to remove the old bushing. Do not try to remove with a chisel.
2. Place bearing on installation tool and press into bore until tool stops against planet carrier.
3. Verify correct depth and that lube holes are not blocked by bearing.
