

**Features & Benefits:**

- Replaces stock bearing and bearing race
- Updates earlier style bearing arrangement for much better reliability

**Part No.**

**12860-01K**

*1 Thrust Bearing*

*1 Bearing Plate*

**PART SUMMARY**

Sonnax now offers a replacement kit for the Chrysler A500 & A518 overdrive unit thrust bearing and direct clutch thrust plate **12860-01K**. These plates fail due to direct clutch thrust plate flexing from the spring load. The bearing plate is designed to have the correct taper on the bearing face that flattens out under the load of the overdrive clutch spring. Many aftermarket bearing plates lack this taper and cause the bearing to fail prematurely. The high quality Torrington bearing is the larger, updated OEM version with a much higher load capacity than the earlier OEM bearing.
