*Turbine, furnace brazed*

#### Part No.

**GM-TA-1**

*Turbine, non-furnace brazed*

### **PART SUMMARY:**

Sonnax now offers an all new 8" Opel impeller and turbine in both furnace brazed and non-furnace brazed options. It is increasingly more difficult to find good usable cores. Eliminate buying multiple cores and wasting time cutting each one open until you can find a usable core. These clean all-new parts are ready to accept a new hub. Combine with any of the available Sonnax Opel torque converter components to build a completely new converter or simply repair your core.
