#### AL-CC-2 is:

Item Number 20 for Allison 1000/2000/2400 Series on Page 40.

Sonnax now offers the Allison 1000/2000/2400 series lockup front cover **AL-CC-2**. The increased strength of this cover has been achieved by using a one-piece forging with increased thickness in critical areas. The mounting surface has also been strengthened by creating a semi-solid, one-piece ring design. The center thrust area is ground and parallel to accept turbine hubs with bearings, fiber or bi-metal washers. This cover also incorporates a higher register to salvage shortened impeller covers.
