Transmission Specialties™ Technical Bulletins

Sonnax publishes a quarterly Technical Bulletin for transmission rebuilders featuring technical tips and new products.

TASC Force™ Technical Tips

These monthly technical articles are written by members of the Sonnax TASC Force™, (Technical Automotive Specialties Committee), a group of recognized industry technical specialists, transmission rebuilders and Sonnax Industries Inc. technicians and published in *Transmission Digest* magazine.

Transmission Specialties™ Technical Articles

Access the expertise of the Sonnax technical staff with this link to all the technical articles included in our Transmission Specialties™ catalogs. These articles help to make our catalogs a valuable shop resource for years.

Transmission Specialties™ Diagnostic Instructions

Links to Valve Body Fix Instructions, General Reaming Instructions, General Wet Air Test and Inspection and to the SonnaFlow charts. For diagnostic instructions related to specific parts [CLICK HERE](#) for Transmission Specialties™ Part Finder.

Torque Converter Journals

This quarterly newsletter focuses on issues of interest to torque converter builders and provides technical information and products designed to save time and money.

Torque Converter Technical Tips

These columns focus on common problems facing torque converter rebuilders, providing advice and solutions. These columns are published in *Transmission Digest* magazine.

Torque Converter Technical Articles

Access the most up-to-date technical articles from our Torque Converter catalogs. These articles offer both general troubleshooting tips and specific information about applications and products.
