### PART SUMMARY

Vehicles with A904-A727, 42RH/RE and 47RH/RE transmissions may have problems with late 2-3 upshifts and oversensitive 3-2 downshifts. These complaints are often due to excessive wear between the throttle valve and throttle valve sleeve. Sonnax now offers the **22771-HDK** throttle valve kit. This kit works well in towing applications where oversensitive 3-2 downshifts are a problem.
