

COMPLAINT

Testing or charging the pump using the converter can be cumbersome

CAUSE

The heavy weight of the converter.

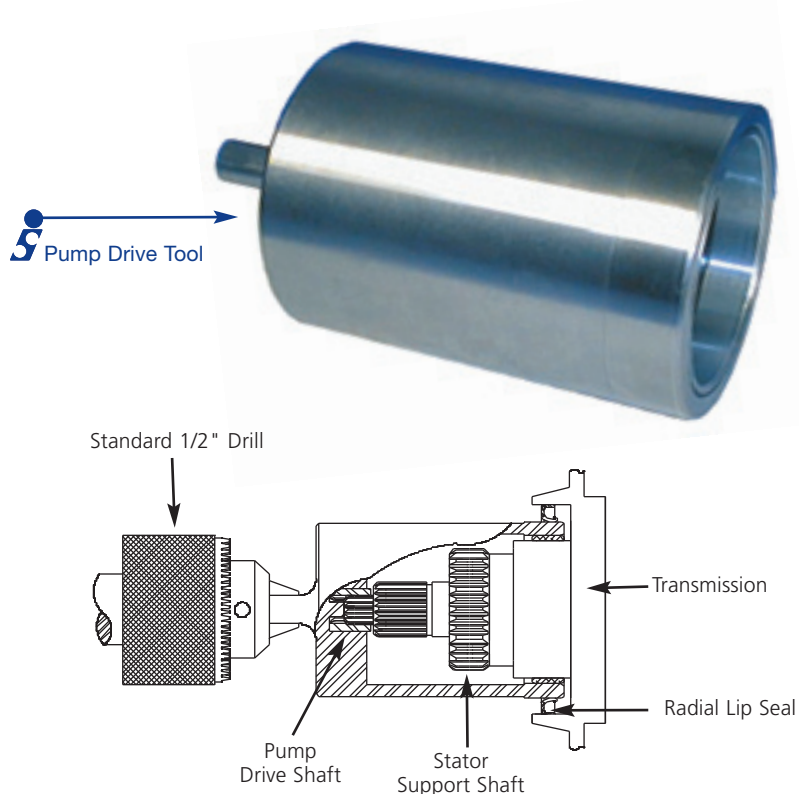

CORRECTION

This Sonnax pump drive tool allows for an easy, pre-installation bench test for circuit leaks.

G4A-HL, 4EAT, G4A-EL, F4A-EL & F4EAT Pump Drive Tool

71151-K

1 Pump Drive Tool

Sonnax Part Summary

There is no easy-to-use, effective tool to test a G4A-HL, 4EAT, G4A-EL, F4A-EL, F4EAT for circuit leaks prior to installation. Sonnax Pump Drive Tool 71151-K enables rebuilders to charge the pump and analyze units on the bench.

Features and Benefits:

- This easy, pre-installation test requires only a 1/2" electric drill to drive the pump.
- Tool installs just like a converter: the bushing rides on the stator support shaft, the O.D. seals the radial lip seal, and the splined insert drives the pump shaft.
